

## Rev. James

Our dear friend Rev. James continues to heal from his accident. The latest medical report from the hospital sent to us by his son Albert assured us that "healing is evident and everything is moving in the right direction". Surgery that was previously discussed has been ruled out, which is a big relief to the family. He will continue his medication and physical therapy, and return to the hospital at the end of October for another checkup. As Albert said:

*"We continue to be so thankful to the LORD, as well for the entire team on ground at Kibbuse vocation and the clinic in the village for their tireless efforts and commitment in seeing that even though Dad James is not active, things are moving. I won't go into mentioning names but the good thing GOD is watching and He is the best rewarder than man! Thank you to each and everyone in everyone's respective capacity and role."*

Psalm 105:2 "Sing to Him, yes, sing His praises. Tell everyone about His wonderful deeds." (NLT).

Rev James and his son Albert.

Rev. James is blessed to be surrounded by family. Pictured are His loving wife Aidah, Albert's wife Doreen, Aidah's mother, and kneeling are Albert's daughters Peace and Promise. Also pictured: Rev. James' mother along with Albert.

Much like the women mentioned in Luke 8:1-3, these women, along with his daughter Norah have been a great support for Rev. James while he heals, as well as when he was traveling to the school and clinic, often being gone for weeks at a time. Aidah especially has quietly shown her love for our Lord, Rev. James and the Kibbuse Foundation which is often overlooked. Please keep these women, along with Rev. James, in your prayers.

## Good Samaritan Clinic

The Good Samaritan Clinic continues to address the needs of the surrounding villages. As you can see in the table below, they have treated 281 people in the month of June, both for current problems and preventative care.

Note especially the number of children seen in the young child clinic. Much of this number includes vaccinations that these children would not otherwise get!

Category of Clients (June 2022)

DEPARTMENT	BELOW 5YRS	5-15YRS	ABOVE 15YRS	TOTAL	COMMON CASES
Outpatient Department	32	15	25	75	Malaria, Respiratory Tract infections, Sexually Transmitted Infections, Tropical Ulcer Disease (Septic), Pelvic Inflammatory Disease and Sexually Transmitted Infections
Laboratory				51	
Antenatal Clinic				21	
Maternity				00	
Post Natal care				00	
Young child Clinic				134	
<b>Total</b>				<b>281</b>	

## Thank you !

We thank all our friends who get this newsletter, whether you can donate or pray for our mission. We hope to visit Uganda again soon, possibly in early 2023. We invite all who feel led to join us. More information will be coming soon.

We ask for your continued prayers for Uganda and Reverend James, as well as for prayers for one of the founders of Friends of Kibbuse, Brenda Schuyler as she deals with possible upcoming heart surgery.
